

# PRODUCT SPECIFICATION

**Model No.: FYSH-3014UWC-120-12V-WW4**

## Features:

- Wide viewing separable flexible strip to be bent into any shape
- Double side self-adhesive 3M tape for easy installation
- High brightness, long life-span
- Product is waterproof

## Applications:

- Channel Letters
- Lighting source for shop windows
- Indoor Decoration Lighting
- Advertising Signs
- Replacement for Neon

**NINGBO FORYARD OPTOELECTRONICS CO.,LTD.**

**Add:**No. 666 Jinghua Road, Hi-tech Park, Ningbo, Zhejiang, China

**Zip:**315103

**Tel:** 0086-574-87933652 87922206 87927870

**Fax:** 0086-574-87927917

**E-mail:**Sales@foryard.com (General)

**Model No.: FYSH-3014UWC-120-12V-WW4**

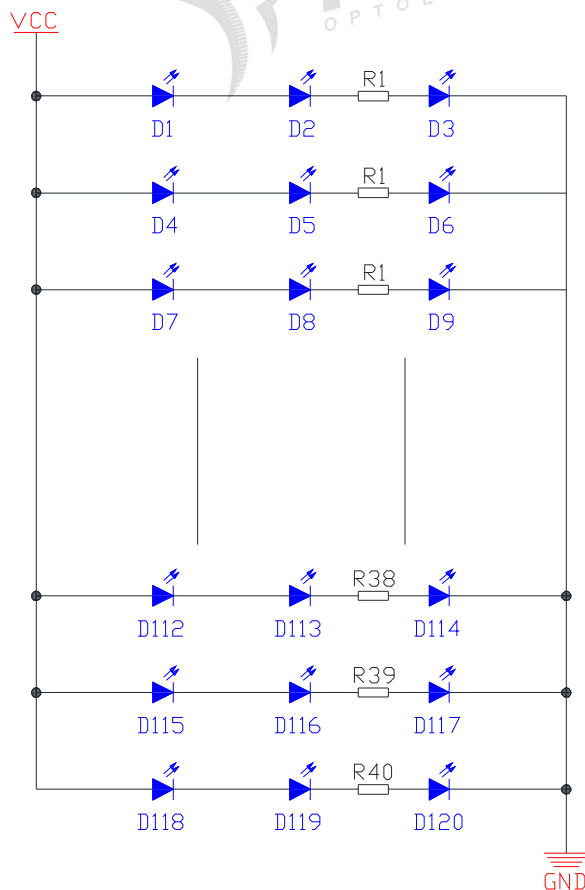

**Technical Features:**

1. Very low energy consumption
2. No UV radiation in the light beam
3. Top Viewing
4. Unique circuit design with strong resistance against static electricity

**Drawing:**

**Schematic Diagram:**

**Notes:**

1. All dimensions are millimeters.
2. Tolerance is  $\pm 1$ mm unless otherwise specified.
3. Specifications are subject to change without notice.
4. The drawing is different from the actual one, please refer to the sample.

**Model No.:** FYSH-3014UWC-120-12V-WW4

**Rating Electrical/Optical Characteristics(1 meter)**

Item	White
Operation Voltage(V)	DC 12
Input Current(A)	0.8
Wavelength(nm)	/
Color Temp(K)	2700~6500K
Luminous Flux(lm)	960
Power Dissipation(W)	9.6
High light efficiency (lm/W)	100
LED Quantity(pcs)	120
CRI	Ra>80
Total dimension	L1000 mm x W4mm x H2.2mm
Protection Level	Nano
Angle(°)	120
Operation Temperature(°C)	-30~+60°C

Model No.	FYSH-3014UWC-120-12V-WW4
Date / Rev.	2020.08.04 / A

Model No.: FYSH-3014UWC-120-12V-WW4

## ■ Typical Electrical/Optical Characteristics Curves(Ta=25°C Unless Otherwise Noted)

### Assembly Suggestion :

1. Connection with soldering wires on unmouted strip: Do not pre tin the soldering pads but pre tin the wires, wires and solder for max 4s at 300°C. Allow soldering pads to completely cool down before the next soldering.
2. There is 3M double side adhesive tape on the backside for easy installation. Care must be taken to provide a clean and dry surface. The mounting substrate must have sufficient structural integrity. Take care to completely remove the protective backing. Once the strip is appropriately positioned, press on the strip to fasten it.
3. The minimum bending radius is 2cm. The strip may be bent over a smaller radius but only in regions of the circuit board containing no electronic components and such bends should be made once and fixed in position to avoid cyclic fatigue.

### Precaution:

1. The LED strip does not have protection against short circuit, overload or overheating. Therefore it is absolutely necessary to operate the strips with an electronically stable power supply offering protection against the above mentioned safety risks.
2. Installation of LED strips (with power supplies) should be made with regard to all applicable electrical and safety standards. Only qualified personnel should be allowed to perform installations.
3. Pay attention to standard ESD precautions when installing the strips.
4. Assembly must not damage or destroy conducting paths on the circuit board.
5. The max length per loop should not exceed 7 meters, otherwise, due to voltage drop, there will be color and brightness difference between the LED's near to power supply and the ones are far away from power supply.
6. The wire with gray line is anode, while the red, green, blue, yellow, white is cathode. Wrong polarity will lead to no light emission only; the strip will not be destroyed. What only needs to is to correct polarity;
7. When installing the strips in the plastic letters or characters, please try to use 3 or 4 branch wires and when doing the connection try to make the strips in a letter or character from a loop circuit or several loop circuits by using red and black wire to connect the strips at the end of the strokes together according to their polarities.
8. When mounting on metallic or otherwise conductive surfaces, there needs to be an electrical isolation at soldering points between strip and the mounting surface.
9. No push, squeeze or press on the components of the strip for fear damaging the electrical components
