

Letter of Environmental Protection Commitment

We will entrench the concept of highest priority of environmental protection, carry out the statutory duty of environmental protection and comply with environmental laws and regulations. Our commitment as follows:

1. We will reinforce environmental publicity, education and training, enhance the environmental awareness of employees, and set up full time (part time) environmental protection agency and employ full-time environmental protection personnel.
2. We will strictly execute the environmental impact assessment and the “three meanwhile” policy, carry out the pollution prevention and ecological protection measures proposed on the paper of environmental impact assessment, start from shutting down outdated production facilities and promoting the technology, reduce the pollutant emission, make sure the pollution control facilities are matched with production capacity and pollutant discharge reaches the standard steadily.
3. We will set up normalized drain outlet and put into force sunshine pollutant emission. We will do self-inspection positively. We won't discharge illegally and omit pollutant discharge, if any; we will be willing to accept all kinds of punishment including stop production for consolidation.
4. We will comply with the pollutant emission permit system, strictly control total pollutant discharge and pay environmental protection tax in accordance with regulations.
5. We will strengthen emergency management and precaution against environmental risk. We will carry out risk assessment of emergent environmental incidents, complete risk prevention measures of emergent environmental incident, check and manage environmental potential safety hazards, formulate and put on records contingency plan of emergent environmental incident, organize and carry out rehearsal regularly and improve capacity of environmental emergency response.
