| 416/240 | 60 | 3     | 0.8                    | 79              | 46kW/57kVA                    | 42kW/52kVA                  |

Prime Power (PRP): Prime power is available for an unlimited number of annual hours in variable load application, in accordance with GB/T2820 (eqv ISO 8528); A 10% overload capability is available for a period of 1 hour within a 12-hour period of operation.

Standby Power Rating (ESP): The standby power rating is applicable for supplying emergency power for the duration of a utility power interruption. No overload, utility parallel or negotiated outage operation capability is available at this rating.

### SALES PROMISES

Baifa Power provides a full line of brand new and high quality products. Each and every unit is strictly factory tested.

Warranty is according to our standard conditions: 15 months from the date BAIFA sold to the first buyer or one year after installation or 1000 running hours (accumulated), whichever comes first.

Service and parts are available from Baifa Power or distributors in your location.

### **ALTERNATOR SPECIFICATION**

Industrial alternators meet the requirements of the relevant parts of the BS5000, VDE 0530, NEMA MG1-22,

IEC34, CSA 22.2-100 and AS1359.

| Alternator Data                   |  |
|-----------------------------------|--|
| Number of Phase                   | 3                                      |
| Connecting Type                   | 3 Phase and 4 Wires, Y type connecting |
| Number of Bearing                 | 1                                      |
| Power Factor                      | 0.8                                    |
| Protection Class                  | IP23                                   |
| Altitude                          | ≤1000m                                 |
| Exciter Type                      | Brushless exciting                     |
| Insulation Class/Temperature Rise | H/H                                    |
| Telephone Influence Factor (TIF)  | <50                                    |
| THF                               | <2%                                    |
| Alternator Capacity               | 52.5kVA                                |
| Alternator Efficiency             | 87.5%                                  |

### **GENERATING SET DATA**

| Related range of voltage setting                            | ≥±5%            |
|---|-----------------|
| Steady-state voltage deviation                              | ≤±1%            |
| Transient voltage deviation (100 % sudden power decrease)   | ≤+25%           |
| Transient voltage deviation (sudden power increase)         | ≤-20%           |
| Voltage recovery time (100 % sudden power decrease)         | ≤6S             |
| Voltage recovery time (sudden power increase)               | ≤6S             |
| Related range of frequency setting                          | 0-5% adjustable |
| Steady-state frequency band                                 | ≤1.5%           |
| Transient frequency deviation (100 % sudden power decrease) | ≤+12%           |
| Transient frequency deviation (sudden power increase)       | ≤-10%           |
| Frequency recovery time (100 % sudden power decrease)       | ≤5S             |
| Frequency recovery time (sudden power increase)             | ≤5S             |
